

LET'S LOOK ON  
THE BRIGHT SIDE

SUN SAFETY

Everybody loves the sunshine. But too much of a good thing can be bad for your health – and your looks. Exposure to the sun's UV rays can lead to skin cancer and speed up aging. Protect yourself by protecting your skin and practicing safe sun.

**Stay underexposed**

90% of non-melanoma skin cancer is caused by the sun. So are 90% of the visible signs of aging. Two good reasons to wear sunscreen 100% of the time.

**Drink up!**

Keep your glass at least half full. Water is always a must, but you need extra H<sub>2</sub>O when it's hot. Sip steadily through the day to stay healthy and hydrated.

**Smear it on**

Use at least 1 ounce of sunscreen – that's about the size of a golf ball – if your arms, legs, chest, back, and face will be exposed.
